

Classification of Interstitial Lung Diseases^{1,5}

Known causes

- Connective tissue disease—associated ILDs
- Drugs
- Genetic
- Environmental exposures

Idiopathic interstitial pneumonias

- Idiopathic interstitial pneumonias
- Idiopathic pulmonary fibrosis
- Nonspecific interstitial pneumonia
- Acute interstitial pneumonia
- Respiratory bronchiolitis interstitial lung disease
- Cryptogenic organizing pneumonia
- Desquamative interstitial pneumonia
- Lymphocytic Interstitial pneumonia

Granulomatous disease

- Sarcoidosis
- Mycobacterial infection
- Fungal infection

Unique entities

- Pulmonary alveolar proteinosis
- Eosinophilic granuloma
- Eosinophilic pneumonia
- Pulmonary capillaritis
- Lymphangioleiomyomatosis
